

Food & Beverage Portfolio

Jones Engineering has been working with some of the world's largest food and beverage producers for more than half a century. We continue to maintain long-term relationships with our clients, which is testament to the level of service we provide.

Jones Engineering Group
Engineering Contractors

Food & Beverage Divison Overview

- Jones Engineering Group is a world-class engineering contractor.
- The ability to tailor our services to suit our clients' needs has firmly established us as a market leader in the food and beverage sector.
- Fast-track project completion is our particular strength.

Ballina Beverages

Ballina Beverages is a state-of-the-art facility in County Mayo. This facility develops the concentrates, beverage bases and syrups for producing the Coca-Cola range of drinks, which are exported throughout Europe and the rest of the world. Jones Engineering Group completed the mechanical and high-purity piping installation at this production plant. The scope of work included over 50,000 metres of pipe work installation, of which 90% was orbitally welded.

Value € 20m | **Programme** 24 months

Diageo / Guinness, St. James's Gate Brewery

Diageo is the world's leading premium drinks producer. The St. James's Gate Brewery, originally founded in 1759, is the largest brewer of stout in the world and is one of the oldest licensed distilleries. We have been working in the Brewery for almost half a century and play an integral role in the expansion and development of the plant. Jones Engineering carry out various mechanical, electrical and sprinkler works; we also provide reliability-centred maintenance studies, preventative maintenance schedules, condition monitoring and plant overhauls, and are currently working on the new state-of-the-art brewery.

Value € 100m

Almarai, Project Cradle, KSA

Almarai is the largest integrated food supplier in the world. Jones Engineering has completed the design, supply and installation of the HVAC Power and Control Installation, Fire Detection / Alarm systems and the electrical elements associated with the refrigeration plant, for this new state-of-the-art nutritional facility in Al-Kharj, Saudi Arabia. The facility will produce infant formula for the Gulf Cooperation Countries. This world-class facility is being built to the highest standards, incorporating the latest in process technology. It features a dedicated visitor auditorium and visitor viewing lobbies as well as full administration, warehousing, laboratories and utilities to support the process.

Value € 15m | **Programme** 20 months

Atlantic Industries, Wexford

Jones Engineering were recently responsible for the installation of the process and mechanical HVAC services to this new state-of-the-art flavour manufacturing and innovation facility. The facility includes manufacturing, laboratory and pilot plant facilities to develop new and exciting flavours of drinks. Our scope of work included the installation of 38,000 metres of pipe, which is a combination of hygienic, carbon, stainless steel, copper, PVC and galvanised piping materials. The main building consists of three interconnecting blocks, made up of functional zones: administration, production (including warehousing) and utilities. We continue to carry out upgrade works for this client.

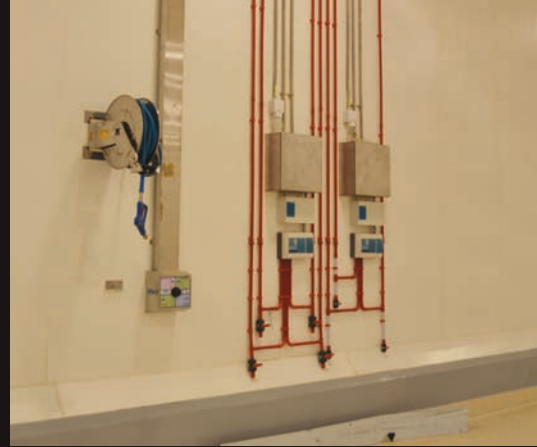

Value € 20m | **Programme** 21 months

PepsiCo, Cork

PepsiCo is the world's second largest food and beverage company. Jones Engineering Group installed the electrical and mechanical plant and HVAC systems in PepsiCo's manufacturing and services facility in Carrigaline. This included the process utility services running on modular pipe racks, which were fabricated off-site at our workshop in Little Island. This facility manufactures concentrate for the Europe/Asia operations.

Value € 15m | **Programme** 12 months

Almarai, Poultry Processing Plant, Ha'il, KSA

Almarai is the largest integrated food supplier in the world. They recently opened a new state-of-the-art poultry processing facility located in Ha'il. Jones Engineering Group carried out the mechanical piping, fire alarm and Vesda fire detection packages to this new facility, and continue to work with this valued client.

Our Accreditations

Safety

We are constantly working in a variety of demanding environments including live hospitals, offshore platforms, multi-storey buildings, live pharmaceutical plants, and heavy industrial plants where safety and quality are paramount. We continue to receive numerous awards for our achievements in safety, which is our number one project value and goal. From our Managing Director down, we commit ourselves to the goal of zero accidents. Every employee has their part to play. We are certified to the Safe T Certificate Standard and hold a triple A-rating.

Quality

All subsidiary companies within the Jones Engineering Group are accredited with ISO 9001: 2008. In developing our management systems, we are continually attempting to go beyond the concept of 'simply conforming to requirements' by addressing other dimensions of quality. Our approach to quality assurance is project specific and customer orientated. The quality of the service we provide to our clients is as important to us as the quality of the installation itself.

Environment

The company considers the protection of the environment to be of primary importance and accept that we have a responsibility to demonstrate sound environmental awareness, management and sustainability through the implementation of best practice.

“Quality work
through quality
people”

جودة تستحق الثقة
Quality You Can Trust
